British Columbia Indians.

We have before us the first report of the Superintendent of Indian Affairs for British Columbia, for the years 1872-73. It is in the form of a Parliamentary Blue-Book, contains forty pages of printed matter, and is a very interesting and readable production. Dr. Powell certainly deserves great credit for having in so short a time acquired such an extensive knowledge of the numbers and habits and requirements of the various aboriginal tribes committed to his care and supervision. From the report we learn that the natives of the country are divided into ten distinct nationalities, numbering in the aggregate about thirty thousand souls. The Cowichans are the strongest nation in point of numbers, and next to them are the Tsimpsheans, who number five thousand souls. The interior Indians are represented as being far superior in general character and condition to those of the coast. The coast tribes are said to retain many of their barbarous customs, the existence of which totally unfits them for the higher life of civilization; but their mental capacity is very great, and where education has been attempted with any kind of system, the results have been not only surprising, but highly satisfactory. Their native mechanical genius is truly wonderful. "Guns," says the Doctor, "are stocked, mainsprings forged, and household furniture manufactured by them with facility and elegance. They are splendid carvers in wood, metal and slate, and the jewellery fashioned from an ordinary gold or silver coin by them would do credit to first class artists." Possessing, as they do, such an aptness for handicraft occupations, it should, as the Superintendent very properly observes, be an incentive to the Government to provide for the establishment of industrial schools amongst them. The women of the coast tribes are represented as depraved and corrupt, virtue being almost unknown and unappreciated by them. This is a sad picture, but it is, alas, too true. The marriage tie is held very loosely among the natives, even more loosely than in New Jersey or Illinois, either party being at liberty to declare a divorce without the intervention of Judge or legal counsel. It is therefore no wonder, in view of this fact, taken in connection with the pernicious example set them by worse than civilized savages with whom they have been thrown in contact all along the coast, that depravity and corruption prevails, and that as a rule chastity is unknown amongst them and virtue is unappreciated. It is quite within the power of the Dominion Government to mitigate if not to entirely cure this existing evil, and we sincerely hope it will be properly applied, and a discontinuance put to a practice as revolting to every sentiment of decency as it is defiant to the moral and religious sentiment of the major portion of the community. On the subject of concubinage the Superintendent observes:—"The custom among the lower classes of white men in this Province, of purchasing Indian women (the Indian form of marriage), and keeping them for a time, is another of the obstacles in the way of their social and moral advancement. After a short time the women, with the issue of their concubinage, are returned to their tribes to eke out a future miserable existence, and in this way a generation of half-breeds is growing up, for which provision will have to be made, or suffer them to become a disgrace to society and a trouble hereafter to the State." It is not true that this practice is confined to the *lower* classes of white men, for there are not a few who esteem themselves, and are estimated by others, a long way above "the lower classes of white men," who are guilty of the same thing. The Superintendent further says, "I am not sure that the people who choose this way of living are not, *ipso facto*, married in the eye of the law; but if not, it is a matter of great importance that the sooner they are made so, by the proper legal remedy, the better." Every right-minded person will say amen to this proposition, and if such were known to be the law it would do more than anything else to cure the evil spoken of. If these women were properly cared for and instructed, they would make excellent domestic servants; they soon take to housekeeping, are cleanly in their habits, and in their dress are neat and tidy. The labors of the missionaries in connection with the Anglican, Wesleyan and Roman Catholic Churches, have been effectual in doing much good in the way of improving the moral and social condition of these native people. At Naas River, Metlakathla, Nanaimo, Victoria, New Westminster, Chilliwhack, Yale, etc., schools have been established in which religious and secular instruction is imparted, and some of the pupils have made considerable progress both in reading and writing. The young people display quite an aptitude for learning, but as they have to acquire a knowledge of the English language simultaneously with a knowledge of letters, their progress is necessarily not so rapid as it otherwise would be. "The promotion of industrial habits," says the Superintendent, "I regard as a necessary adjunct not only to their secular but religious instruction, and I believe the different missions of British Columbia would be glad, if sufficiently aided, to establish industrial schools under proper government inspection, as being the most successful mode of obtaining the future welfare and happiness of the Indian." Attention has already been devoted to instructing them in agricultural matters, and the success which has attended these first efforts will, it is anticipated, become more general by the introduction of a policy calculated to wean them from their migratory habits, and by locating appropriate reservations. Nearly all that has so far been done to ameliorate the condition of the natives, has been the result of philanthropic effort on the part of private individuals or christian associations; we hope that Dr. Powell's report may have the effect of stimulating the Government to adopt more active measures for their mental and moral improvement.

The great bane of the Indian race is the traffic that is carried on amongst them in intoxicating liquors. True, there is a stringent prohibitory liquor law in existence, but it is the next thing to a dead letter, its provisions being violated almost with impunity. That the law could be more stringently and effectually enforced than it is, we have every reason to believe; but we fear that those charged with the duty of seeing the law enforced and bringing to punishment those who contravene it, too frequently wink at its infraction. The Dominion Government, however, through the Superintendent of Indian Affairs of the Province, will, we are satisfied, do all in their power to elevate the condition of the native race as a whole, and a decided advance has been made in the direction of bringing about this improved order of things by obtaining an accurate knowledge of the position of the tribes and their requirements.

STITCH! STITCH! STITCH!—But no longer with fingers weary and worn. For the justly celebrated "Lockman Sewing Machine" can be had of the undersigned. This machine has more points of excellence than any other yet invented. In simplicity of construction, perfection of workmanship, ease of working, durability, cheapness, and many other valuable qualities, it stands unequalled. The Daily Standard

Thursday, August 28, 1873.

City Council.

A meeting of the City Council was held last night. Present: His Worship the Mayor in the chair, and the following Councillors—Gowen, Taylor, Keast, Drummond, and Hayward.

After routine, a number of accounts were passed to the Finance Committee for payment if found correct

COMMUNICATIONS.

A letter from the contractor for the Federal buildings, acknowledging the receipt of a notice from the Council, ordering him to remove certain obstacles on Government street, and stating that he was powerless to do so without authority from Mr. Pearse, was received and filed. An acknowledgment from Mr. Pearse of the receipt of a similar notice, was also filed.

An application from Messrs. Bunster, Gowen, Griffin, Loewen and Erb, (who have entered into copartnership, and leased the plant of the Spring Ridge Water Co. for supplying the city with water) for permission to open up the various streets of the city, as the necessities of their business might require, was read.

Councillor Drummond said he should oppose the application, unless the company stated that they were prepared to fulfil the obligations that the Spring Ridge Co. were under, when in operation, to the city. He should like to see a statement attached to the application, informing the Council that the Co. would keep the cisterns of the Fire Department supplied.

Councillor Gowen said it was the intention of the company to keep the cisterns filled at all times. He hoped the application would not be postponed, as it delayed the business of the company, and hindered them from disconnecting or connecting pipes and the mains.

Councillor Drummond said the communication ought to have stated this, and the Co. have couched their application in proper language. He was in favor of having a written promise before the Council, with reference to supplying the cisterns, and would insist upon having the matter laid over till next week.

Councillor Gowen remarked that a proof of good faith had been exhibited by the Co in turning on the water for the use of the citizens directly a lease had been obtained.

Councillor Keast opposed granting extraordinary privileges to any one company or individual. He thought that due notice should be given the Council for opening up the streets at any time.

The motion by Councillor Drummond to defer the matter one week was then carried.

An application from William Avons for the sum of $260 in payment of his account for services rendered during the recent quarantine—waiting upon the sick, etc.—was received.

Councillor Drummond said that there was no doubt the city had employed the applicant, and consequently he ought to be paid by the city.

Councillor Hayward moved that the communication be received and filed. Carried.

A letter from Messrs. Kelly & Sims asking for re-imbursement from the Council on account of loss sustained by them in their efforts to supply the city with water was read.

Councillor Taylor said that another gentleman who had bought a horse and a water cart, and caught a bad cold in driving around town with water, intended to send in his doctor's bill. (Laughter.)

Councillor Drummond vehemently appealed to the Council to protect those parties who had been induced to sink wells in the time of need. It was not honorable, not gentlemanly, on the part of the Council to "throw off" on them now that they asked for some consideration at their hands for loss incurred.

Councillor Keast asked if these gentlemen would have presented the city with a dividend if their operations had proved a success.

(A voice—"Not much.")

After further discussion the letter was on motion filed.

The fire-bells here struck an alarm and the Council adjourned; upon re-assembling they went into Committee of the Whole on "water."

HON. MR. NATHAN.—We saw a letter yesterday from Henry Nathan, Esq., M. P., dated in England, July 24th, and written before he sent his telegram, recently published here. Mr. Nathan had just then received copies of Canadian papers in which appeared Sir Hugh Allan's letter and other documents referring to what is here termed "Nathan's fifty thousand dollar arrangement." He indignantly and most positively denies that he knows anything whatever of the question, and says that any act of his done in connection with the building of the railway was done with a view to benefit the Province to which he considered he himself belonged. Mr. Nathan states, too, that Donald A. Smith, Esq., now in England, and one of the members in the Dominion Parliament for Manitoba, whose name is also connected with the railway scandal, was likewise indignant that his name should be associated with a transaction of so base a character.

SIR JOHN TAKES A "HEADER."—THE REPORTED SUICIDE.—It seems that Sir John playfully took a "header" into the water when at the seaside, and made good time under the water, having previously bid his friends good-bye, and when he came up again had a quiet laugh at them for their ignorance of his prowess as a diver. This little incident led to the report, spread by his enemies, that he had attempted suicide. He was only giving another instance of the versatility of his talents; he was proving himself a mighty swimmer, as well as a mighty warrior. He was, perhaps, testing his lungs' power to see if those important organs were all right, to afford him assistance in the speech with which he will scatter his miserable maligners.

AMERICAN OPINION OF THE STATE OF THE BRITISH EMPIRE.—After reviewing the Queen's speech proroguing Parliament, the New York *Herald* says: "The Queen's speech always, as is most natural, puts the general situation favorably. In spite, however, of the rose color, it is undeniable that the Queen not unfairly states her case; and the condition of the British Empire is a reasonable subject for congratulation. Would that so many encouraging and hopeful statements could be made regarding either France or Spain!"

NAVAL.—We hear that a field day with the marines and blue jackets of the fleet stationed at Esquimalt will shortly be given. In the absence of a review of the ships of the fleet, this would give a good day's amusement. We hope, however, that Admiral Hillyar will order a review as well. In former days in the history of the Province, naval reviews were held and were witnessed with delight by thousands of the inhabitants of town and country.

CARRIAGE STANDS.—The following was passed at the meeting of the City Council held last evening: *Resolved*—That all buggies, cabs, etc., for hire, shall stand along the centre of Yates street, westward; and that all express wagons shall stand along the centre of Government street, northward.

THE line commenced to work last evening.

Vandalism.

The settlers who hold land in Saanich and districts contiguous to the beach, are, some of them, heavy sufferers in the loss of live stock, ruthlessly slaughtered and carried away by desperadoes who watch an opportunity to commit their depredations. There are good reasons for supposing that Indians, when going north from this city, are the guilty parties. One gentleman,—we take the liberty to mention his name,—Mr. Wilson Brown, has lost very recently two valuable heifers, imported from England at a very heavy outlay. Besides these, he has lost from time to time, some fifty fat hogs, all no doubt shot, and carried off by lawless white men, probably to San Juan or other of the islands in the Gulf of Georgia. But as we said before, there are good reasons for believing that Indians are the vandals. This grievance, we are informed, is becoming so intolerable, that we fear settlers will be compelled to abandon their farms and ranches. Persons who bring into the country at a large expense, thoroughbred stock for the improvement of the live stock of that country are public benefactors, and are entitled, we should say, to public compensation when this stock is maliciously and ruthlessly destroyed by outlaws. Again, cannot something be done by the police authorities, or by the Government, whereby this lawless practice can be stopped? Why not offer a reward for the arrest of parties suspected guilty. We should think that this would have the desired effect. We are quite certain that if we but direct the attention of our active Superintendent of Police to the nefarious acts related and complained of, he will use all diligence to bring the vandals to justice.

WILL SHORTLY FOLLOW.—The *Colonist* says "Nine victims of the free grant humbug sailed in the Prince Alfred, to spread far and wide the story of their wrongs." It is stated that our contemporary, failing to get the nourishment for its elephant,—*Colonist* steam presses,—will shortly follow those nine deluded *victims* to the home of Uncle Sam, and there try its game of blackmail against all who don't give the *Morning Wrapper* a "free grant." It is really too bad that neither the Government nor the public recognize the worth and ability of this imposition of a newspaper.

RUNAWAY.—Mr. Bunster's double team ran away with him and another gentleman in a light wagon, on Tuesday last, but by dint of perseverance in the shape of hard pulling, sawing, and "downing" breaks, the horses were kept straight and at last brought to a halt. One of the horses took fright and bolted, inducing his companion to accompany him, but we noticed the fractious quadruped a few hours later drawing a heavy truck with five hogsheads of "Bunster" on board and he didn't seem at all inclined to repeat his agile efforts.

A BAD STATE OF AFFAIRS.—A dispute has arisen between the contractor for the erection of the Federal Buildings and the Dominion engineer of the Province, and yesterday Mr. Foster was engaged in removing some of the large stones which have been prepared for the structure. This is a bad state of affairs and one much to be regretted; Christmas will soon be upon us, and the Federal buildings *in statu quo*.

FIRE.—The Fire Department was called out last night about 9 o'clock; their services were not, however, required, as it was discovered that only an old stump near to the residence of Mr Rhodes was burning. We would remind over zealous alarmists that a wilfully false alarm is liable to be counteracted by the imposition of a fine of $50 on its originator.

FOR NEW WESTMINSTER.—The steamer Maude sailed yesterday morning at 7 o'clock, for New Westminster, with passengers, freight, and the lower Fraser mails. Amongst the former were Chief Justice Begbie, the Hon. Attorney General, and Richard Woods, Esq., Registrar.

FROM THE INLET.—The Cuba, lumber laden at Burrard Inlet, arrived in the Roads yesterday in tow of the Goliah. Capt. Raymur, G. W Haynes and a few others came to town from the Inlet, and the Goliah left shortly afterwards for the Sound.

ON THE WAY.—Three vessels are looked for to arrive at the Hastings mill, Burrard Inlet, to load lumber for foreign ports, the Red Rover to take spars for Europe, the Bramer and the Leonora to take in sawn lumber.

POLICE COURT.—James Bearns, charged with stealing, was discharged yesterday. A drunk and disorderly person was remanded until to-day.

LATER.—The public buildings will be recommenced at noon to-day.

The Largest Vessel but One.

The City of Chester recently constructed for the Inman Line, is perhaps in size, finish, and general arrangement for the safety and comfort of passengers the finest vessel that has yet crossed the Atlantic. The Great Eastern was longer we know, but we fancy this ship, 474 feet in length, with 44 ft 6 in breadth of beam is large enough for all purposes. The Chester was built by the Messrs. Caird of Greenock, being the first ship built by the Cairds for the Inman line. The ship is of iron, as is well known, that timber for steamship purposes is out of date. The construction the City of Chester is of the very highest character. She is built of the best material of every kind. Her framing is exceedingly strong and massive; and on each deck there is a range of stringer plate of extra width and thickness, which is securely riveted to each deck beam around the ship, an arrangement which gives great additional strength and tenacity to the whole fabric. She is also divided into eight compartments by seven water-tight bulkheads, by which arrangement provision is made against accident by fire or leakage, as in either case the injury could be confined to the compartment in which it originated, and thus the amount of peril would be reduced to a minimum in the event of any outward circumstance. Still further to provide against accident by fire, the ship is abundantly supplied with hose of large size, and is provided with pumps which can be worked by steam or hand; there is also a fire annihilator among the regular stores of the ship. She has ten large and first-class boats, eight of which are on the most approved life-boat principle, and all of them are fully equipped in every particular. In short, every precaution has been adopted to prevent accident, or to provide the best possible means for diminishing its effects if unfortunately an accident should occur. Nothing can exceed the taste and harmony of the interior painting and general finish of the ship. The panelling and wainscoating is in imitation of the cathedral of Chester—a compliment to the city whose name the ship bears. If the passenger is in his or her berth and wants a waiter, the passenger has a contrivance within his reach which, with electric speed, summons a servant, or, if in the same room the passenger is seated, right at his shoulder is a button, which pressed makes the want of help known at the chief steward's headquarters. Smoking rooms, ladies' saloons, closets, bath rooms, and finely ventilated sleeping rooms, rob the sea of all power of discomfort, so far, it would seem, as human brain could suggest.

Disastrous Storm in the Eastern Provinces.

THE BANK FORGERS SENTENCED TO PENAL SERVITUDE FOR LIFE.

CANADA.

RICHIBUCTOU, N. B., Aug. 26—A storm commenced on Sunday morning and lasted until last night. The tide rose several feet higher than usual and swept away a number of wharves. Eight barks and several brigs were driven ashore, only two or three of which will be saved; two or three schooners were lost. The grain in the fields was badly damaged.

QUEBEC, August 26—By the late storm two schooners were driven ashore; the crews were saved. A bark was driven high and dry; several schooners were totally wrecked and three lives lost. Several bridges were carried off and telegraph wires and posts carried into the river.

CHATHAM, N.B., Aug. 26—A furious gale of easterly wind commenced on Sunday morning, and raged with extreme violence until Monday morning.

Great marine disasters are reported. Seven square rigged vessels are reported wrecked at Richibucto. Two vessels were driven ashore in Miramichi river, with several schooners. Bridges were carried away, and communication stopped both by mail and telegraph.

EUROPE.

MADRID, August 26—Lizzaraga, with 3,000 men, is reported marching to reinforce the Carlist forces besieging Estalla, who now number 8,000. The latter were again defeated on Monday with considerable loss by the Republican force.

LONDON, August 26—The trial of the Bank of England forgers was brought to an end this p. m. After George Bidwell had concluded his examination, he delivered an address to the Court in which he exonerated Austin Bidwell and Edwin Noyes from all complicity in the fraud, and stated that he and George Macdonald were the only guilty ones. Macdonald also addressed the court, bearing out the statements of Bidwell. The case was then given to the jury, who after twenty minutes' deliberation, found all the accused guilty. The court immediately sentenced each of the prisoners to penal servitude for life; the highest punishment under the laws for the offence.

VIENNA, Aug. 26.—The Emperor Francis Joseph yesterday visited the American department, and inspected the exhibition of the education system of the United States, to which he awarded a high prize.

BERLIN, Aug. 27.—Carl Wilhelm, the composer of the famous German war song, "The Watch on the Rhine," died to-day.

EASTERN STATES.

EVANSVILLE, Aug. 27.—The steamer Belle Vernon, Capt. Jas. Kensington, going to Cincinnati with a full cargo, struck the Jennie Powell below the Shawnee, and sank in 20 feet of water. A number of lives were lost.

Bad Reporters of a Good Country.

EDITOR STANDARD:—Now and then we hear of some one after a hasty touch upon the shores of British Columbia leaving for other parts. What's the matter? Why is this? Allow a hint or two to be offered for the benefit of strangers seeking, *honestly* seeking a resting-place in this rich and magnificent Province. First let them beware of slanders on the decks of ships, not friendly to British Columbia, who run a quasi immigration ticket for the Puget Sound or Eagle, and often to further an object much more selfish and local, such as a land speculation or liquor house.

The steamer Prince Alfred, running between this Province and San Francisco brings passengers of all nationalities, and during these trips passengers are often prejudiced by parties seeking to give all possible attraction to Puget Sound by fabricating evil reports about everything belonging to this Province.

Think of strangers on their way to our shores being told that British Columbia is a "mean hole," "Victoria is gone to the dogs," "Wells, Fargo closed up," "British Columbia Bank pays no dividend," &c., &c. Of course many know that such wandering slanderers of our Province are more likely to feel at home with the noted "hoodlums" of San Francisco, than in this land of domestic and public safety. Some of these "evil reporters" do more at *humming* the public streets, oftener making a free use of knives and pistols. Because many of this class are made to feel the virtue, honest toil, the ends of civil justice, and manliness of the Province, they blackmail it.

Let all immigrants beware of such reckless and unprincipled advisers, and that this country, though young, *courts* on a superior scale, the scrutiny of common sense, industry, integrity and enterprise, giving an unsurpassed and reliable promise of a rich and speedy reward to all right minded parties who enter it. It may fairly be questioned if any country ever showed as great a yield in stock grain and fruit, for the same amount expended in money and labor, as this has already done. If men will allow themselves to be misinformed, turn homesick, and leave without ascertaining the facts, and the great variety of openings in this Province, they must simply pay the cost of their own folly and leave others to enter into a most enjoyable climate and productive country.

Let any sensible man seeking a farm, look in at Mr. Ladner's, just a little above the mouth of the Fraser, and witness a sample of the products of the soil—fruits, vegetables, roots, timothy,—and then proceed up the large slough as far as Mr. Arthur's, and so across to Messrs. Tesker's, Byron's, Jackson's, Letbaby's, Burr's, and down to Mr. Green's landing, and he will become convinced not of the extent only, but of the beauty and excellence of that large prairie. The North Arm of the Fraser has given full proof of the same richness and productiveness, to say nothing about large and prosperous settlements further up the river, such as Maple Ridge, Langley, Sumass and Chilliwhack. If the Land Office is fully awake, giving prompt information, the school system pushed on with other departments, this Province will soon silence its slanderers, and fill the coast and the Dominion with its praise.

VICTORIA, Aug. 27, 1873. B.

A dream came o'er me as I lay
With head on pillow pressed,
Of such a splendid fitting Coat
And Pants, and such a Vest.
Me thought that as I walked abroad
All eyes on me were cast,
But ah! my dream it passed away
T'was far too bright to last.
But still before my eager gaze
Would come the dream of other days.

One day as I walked out alone,
My mind with sadness fraught
I wondered if in this good town
Such Clothing could be bought;
Just then a friend was passing by
Who saw the sadness in my eye,
So kindly asked me, him to tell
What grief o'er me had cast a spell
I told him of the vision seen,
Said he, go buy of **David Green**.

Hints About the Railway Construction.

VICTORIA, B. C., 23rd Aug. 1873.

EDITOR STANDARD:—On the 14th of September, 1870, I mailed the following allusion to Sir John A. Macdonald, Minister of Justice of the Dominion of Canada. I have learned through Mr. Wootten that it has reached his hands, but from him I have received no acknowledgement. It appears that the charter to the railroad company has not yet been finally confirmed, and as there are some points in this document that have received the approbation of men of sense in this community, maybe it might be useful to the people to discuss it on its merits, and practically to make use of the suggestion therein contained. I have no correct copy of the document with me, thus have to trust to notes and memory to re-write it. I think it will not vary much from the original document, which was as follows:

To SIR JNO. A. MACDONALD:

SIR.—I do not wish to intrude upon you any longer than the time it may occupy you to read this.

I am told that the Dominion Cabinet have not yet yielded their great monied liberties to any continental railroad company, and I earnestly protest, as a son of this Dominion, against it. The result of such gifts are apparent in the United States; a railroad oligarchy rolling in wealth, real and speculative, that can control the Councils of that nation of forty millions of people exists and is apparent. Now where would our little Dominion be if she with lavish and improvident hands threw away her wealth into the hands of a few directors and stockholders in a great railroad scheme. Our forty millions of people would be bought at every election cheap at ten dollars per head to retain the franchise in the hands of the company. You do not believe this because you think that by law you can intrude into the office of the company at any time to watch its proceedings. This may be true, but you can never get back to the Dominion her lands or the gifts in money you intend to make. It is said that the question is railroad across the continent with a corporation, or no railroad without one. Is it because you think that you have not ability enough in your own National Assembly, honestly to lay out the people's money or collect its revenue. It is both. You had better say you cannot manage your Custom House department or your Post Office department. Then why could you not receive the revenues of the Pacific Railroad Company.

What is it you are going to give away? The unappropriated lands upon each side of the railroad track, 2000 miles long and better; say between fifty and sixty millions of acres and thirty millions of dollars in cash for nothing at one fell swoop. In the name of the people of this Dominion hesitate, ponder, and then set to work and do the great thing yourselves if it is construction only for glory. Neither the late Mr. Waddington nor yourself can lay claim to the conception of the idea. This belongs to an English gentleman, who I believe met his death in the first railroad that ever run on English ground. We cannot all expect to wear stars in this world, and the splendor of yours will not be dimmed by riding through to the Pacific in the first car which you are working so hard to set in motion.

If your Custom House influence and your Postal department have not corrupted your House of Commons, neither will the railroad outlay or its revenues do so. If the scheme in your judgement will never pay, do not swindle merchants into your plans and bring down their families' curses upon you because you have large presents and bribes to swing before their eyes. But how immeasurably they will be magnified in future generations when the reigning lords, their descendants, will point to the lucky directors of this generation as the founders of their families, which will evidently be the result in a year after the opening of the track through.

No man willingly undertakes to tear down the schemes of another, unless he is prepared to offer a substitute in its place. I therefore meekly submit for your consideration the following plan: That the railroad be built by the Dominion, that a standing committee be appointed, and a special railroad lands and works revenue and expenditure office be instituted and organized out of the House of Commons of the Dominion, that said committee be paid per day for each sitting, and that they have power to appoint all clerks and engineers, and give out all contracts through a Commissioner of Lands and Works, such appointments to be endorsed by the Commons in session after abilities are proved. No officer in the employ of the company from the most subordinate to the highest to be employed who is not honest, not a drunkard or a gambler, his other moral qualifications we leave to him and his creator. For the financial part of the scheme we have fifty-five millions of acres of land along the track, value 55 millions of dollars. Issue bonds for this amount in sums of $160 each, bearing interest at the rate of 6 per cent. per annum, with a land warrant of 160 acres of surveyed land in any part of the Dominion attached to it as a collateral security, said bond holder to draw interest upon said bond, while being the holder. But upon electing to take the land in lieu, said bond to be cancelled and the land to become his or hers in fee simple, these bonds with this security through proper agencies to be sold in the Dominion and through out Europe by proper financial agents, expenses being deducted; fifty millions of dollars for service may be produced, and with the further sum of thirty millions of dollars contemplated to be appropriated, you will have eighty millions of dollars. This is the sum you are giving away, being the cost of two-thirds of the entire track, provided it is 2000 miles long. If you cannot raise the money this way how can a few unknown individuals do it, some of whose names we have never heard in this part of the Dominion.

You will therefore have to add to the Dominion expenses $4,800,000 interest per annum, provided your bonds are sold in the first year. But this will not be the case; it will take several years to build the road, and as fast as the settlers who are bondholders pour into the Dominion and occupy the land, interest upon the fifty-five millions will cease. Besides you will have all the benefit of town sites and other enhanced (in value) land to fall back upon.

I think I have explained the idea in full to you. Your comprehensive mind will grasp at once the plan or reject as utopian the suggestion of an admirer of your administration and a lover of his country. I remain, your Excellency's most obedient servant,

JAMES NEALON THAIN.

APPENDIX.—I forgot to mention in the body of this article that an idea has long been the subject of my thoughts, namely, the employment of Asiatic labor, as according to our laws and in accordance with Imperial guarantees no distinction can be made between them (the Chinese) and the most favored nation. Vide the Elgin Treaty. I would respectfully suggest that all laborers employed upon the works of the railroad shall pay a laborer's license of one dollar per month per head, or $12 per annum, payable quarterly. I think the principal quantity of labor will be performed by Chinese, thus the tax will fall upon them and not upon white or European laborers. But if such a tax would only increase the cost of the construction, I would abandon the idea and leave to the judgement of the overseer whether it would be most advisable to employ European laborers, at $50 per month, rather than employ Chinese at $30 per month. (It appears to me to be a phantom to fear the Chinese laborer interfering with the prosperity of the white population. They do not bring their females with them, do not propogate, and when the want for their cheap labor dies out, they will vanish and be lost in the mass of the population or retire back to their own country). Thus if 50,000 Chinamen were employed, $600,000 per annum would be raised, enough to pay interest upon the first and second years' loan. If a graduated scale of tax was levied upon all parties engaged in the railroad employment, it is possible a revenue of greater volume and importance could be realized, and the burden lifted off the shoulders of the rest of the Dominion. It may be a paradox, but the tax will not raise the price of the labor, if that tax is small. Your Excellency will pardon bad composition and my being so tedious, I am certain.

The Woman Question.

So uselessly, aimlessly drifting thro' life,
Pray what was I born for? "For somebody's wife,"
I'm told by my mother, though, that being true
My "somebody" keeps himself strangely from view.
And if naught but marriage will settle my fate,
I believe I shall die in an unsettled state.
For though I'm not ugly—pray, what woman is?
You might easily find a more beautiful phiz;
And then, as for temper and manners, 'tis plain,
He who seeks for perfection will seek here in vain,
Nay, in spite of these drawbacks, my heart is perverse
And I should not feel greateful "for better or worse"
To take the first booby that graciously came,
And offered those treasures, his home and his name.
I think, then, my chances of marriage are small,
But why should I think of such chances at all?
My brothers are, all of them, younger than I,
Yet they thrive in the world, and why not let "me" try?
I know that in business I'm not an adept,
Because from such matters most strictly I'm Kept.
But—this is the question that puzzles my mind—
Why am I not trained up to work of some kind,
Instead of thus waiting the best of my life
To be an apocryphal "Somebody's wife?"
